

Class 4 Homework Grid 03.12.18 to 17.12.18

We will celebrate and share your homework and creations on Monday 17th December. Maintain your own high standards of presentation, remembering to carefully stick beautifully completed work into your homework book/folder.

English - Curiosity, Wonder and Attention to Detail

Over the coming weeks, we'll begin to understand what makes 'Mina', a curious character from our shared book Skellig, really tick. And just like Mina, pick up your pencils and pens and draw a beautifully detailed sketch of a common garden bird found in Britain. Write an equally detailed description of its appearance and remember to really look.

Maths - Equivalent Fractions

To be a complete expert in fractions you must be able to find equivalent fractions (a fraction that has different numerators and denominators but is the same amount) easily. Write down five more equivalent fractions for each of these fractions.

$\frac{2}{3}$	$\frac{3}{4}$	$\frac{4}{5}$	$\frac{5}{12}$	$\frac{16}{20}$	$\frac{15}{25}$
---------------	---------------	---------------	----------------	-----------------	-----------------

English - Spelling

Find each of the root words in the following words and explain their meaning: **vicious, precious, conscious, delicious, malicious, suspicious, ambitious, cautious, fictitious, infectious, nutritious.** Can you find the spelling pattern? What do you notice about the root words that have 'cious' as an ending.

Creative Learning

As part of our Science and Geography this term, we are learning about 'Solids, Liquids and Gases' and 'The Water Cycle'. This is your last chance to draw, model, programme or bake your own illustrative version of how water is constantly changing state on our planet by creating the Water Cycle.
